October 21, 2021

## Abstract

Tax depreciation schedules dictate how businesses can deduct investment from their tax base. In this research note, I first provide an overview of depreciation schedules and document several facts on tax depreciation policy across space and time. Then, I suggest a simple approach to approximate tax depreciation schedules - to facilitate their introduction in modeling exercises – and assess the validity of such an approximation. Finally, I show that failing to model tax depreciation schedules explicitly can result in large approximation errors.
